Full Stack Engineer

I am a Full Stack Engineer with experience in developing web and mobile applications. During my professional career, I worked on a variety of projects and technologies, which has allowed me to acquire solid skills in the field of software engineering. Currently, I work as a Full Stack Engineer at Tres Pagos, where I work in a remote environment using technologies such as Firebase, NextJs, TypeScript.

Technologies

• NodeJs	• Express	• Docker
• Firebase	• JavaScript	• Docker Compose
• PostgresSQL	• Git – GitHub	• Google Cloud
• MongoDB	• Tailwind	• React
• Wordpress	• Elementor Pro	• React SEO
• Hubspot	• Cloudinary	• Redux

Experience

Bootcamp SoyHenry   (“Group Project”).

August 2022 - June 2023 (11 months)

      Participate in the development of a 100% functional ecommerce and scalable to where the client wants In this project I will learn to work as a team in addition to participate in the frontend and backend area using React, Redux, CSS, JavaScript among others in the frontend and in the back using vite, typescript, mongodb, mongoose making related models or scalable and

modifiable REST API routes as you go expanding requirements or resources. (it is an academic Project However, it helps me work as a team and practice git flow)

here I leave you the project

https://www.cyberzon3.com/

Full Stack Developer ("SoyHenry Project Individuality)

"Project Food" Program | February 2023 - March 2023 (1 months)

Development of an application tends to be implemented by receiving the information through an API to receive the list of recipes, which are consulted and if I register my own recipe stored in the designed backend. Back shown on the front making a list of cards, JavaScript, Redux, HTML, CSS, NodeJs and other technologies. Exhibition of the functionalities required for the sprints in weekly demonstrations.
